## W.H.Kemp - A Quality Approved Connection to Industry

### W.H.Kemp (Electrics) Limited

Founded in 1967 the company enjoys prime position at its purpose built manufacturing facility and offices in Westbury, Wiltshire, where it employs over 100 people. The company philosophy to re-invest in modern equipment and staff training wherever possible means that our customers benefit from the latest technology, our vast experience and our impressive competitiveness.

W.H.Kemp have over 40 years experience and know how in the manufacture of cable harnesses and complete sub-assembly solutions.

We continue to supply the following industries world wide:

### Utilities Industry

W.H.Kemp supply cable harnesses and sub-assembly units to the Power, Telecom, Gas and also the Water Industry. In all cases the highest quality is consistently achieved.

### Automotive Industry

### Automotive Industry

All of our automotive harnesses are manufactured and assembled to strict customer specifications to ensure a perfect fit and function for top level performance. Stringent Production and Quality Control Standards are followed throughout the company, giving the customer total satisfaction.

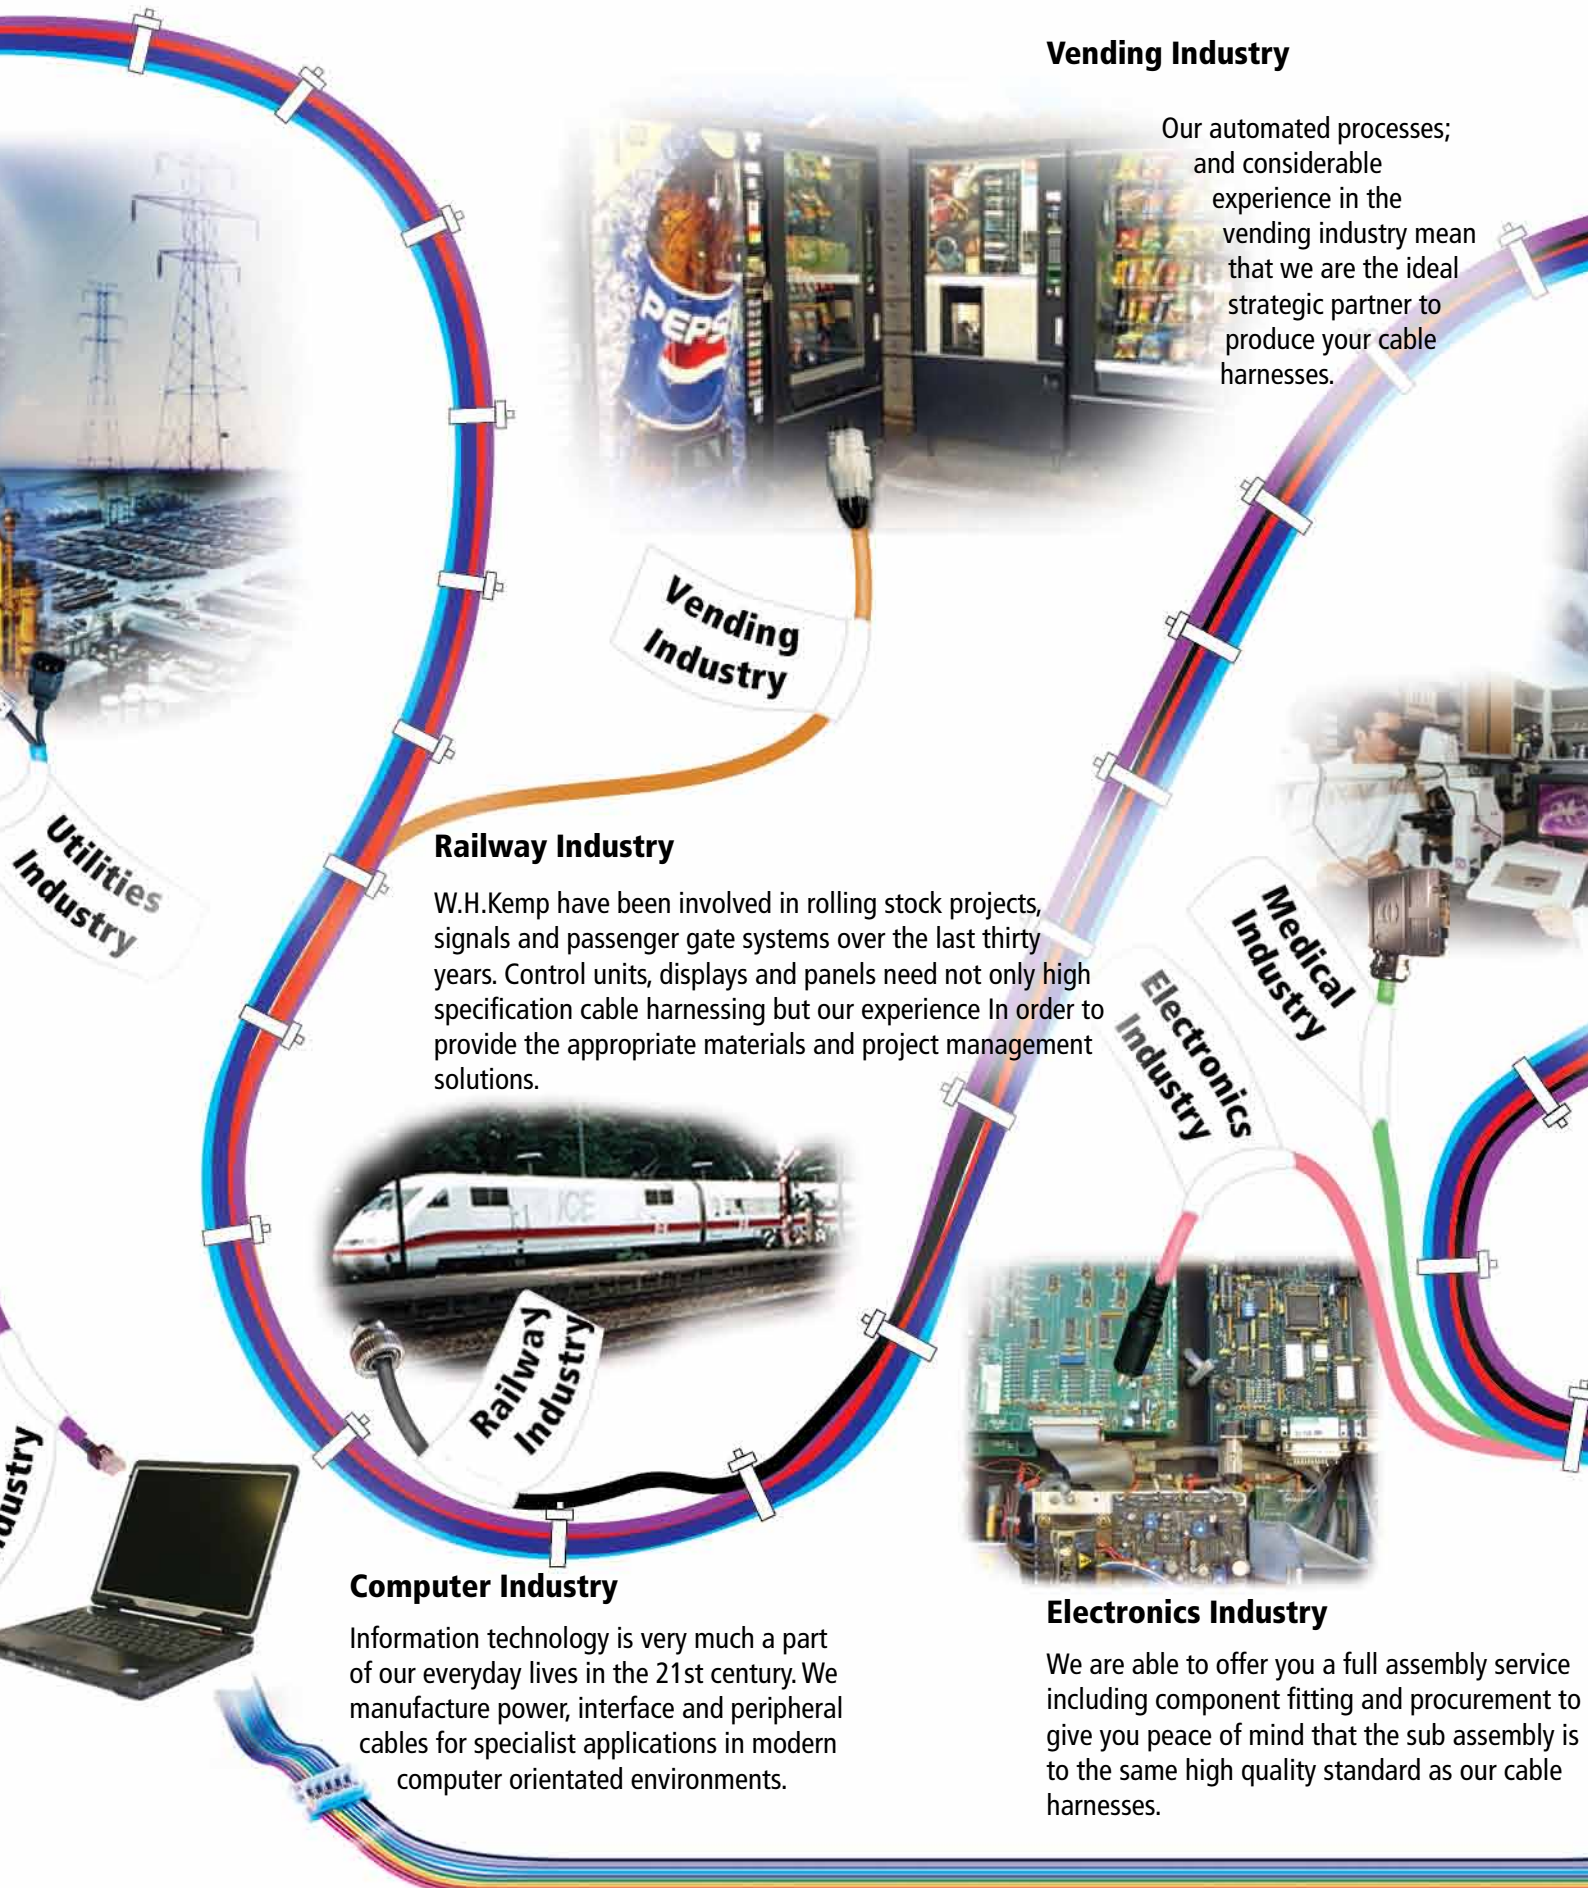

### Petrochemical Industry

### Petrochemical Industry

Our harnesses drive actuators and motorised valves that are used in some of the most hostile and demanding environments in the world including oil refineries, gas rigs, oil rigs and sub-zero temperatures. W.H.Kemp have serviced this Industry for over forty years.

### Computer Industry

### Vending Industry

Our automated processes; and considerable experience in the vending industry mean that we are the ideal strategic partner to produce your cable harnesses.

### Railway Industry

W.H.Kemp have been involved in rolling stock projects, signals and passenger gate systems over the last thirty years. Control units, displays and panels need not only high specification cable harnessing but our experience in order to provide the appropriate materials and project management solutions.

### Computer Industry

Information technology is very much a part of our everyday lives in the 21st century. We manufacture power, interface and peripheral cables for specialist applications in modern computer orientated environments.

### Electronics Industry

We are able to offer you a full assembly service including component fitting and procurement to give you peace of mind that the sub assembly is to the same high quality standard as our cable harnesses.

## Medical Industry

W.H.Kemp build and have a firm understanding that applications such as laboratory analysis equipment, patient monitoring networks, hospital equipment, MRI, radiology, etc. demand the latest innovations in medical cable design and the ultimate in reliability.

## Aviation Industry

From ground-based projects to airborne functionality we have provided the aviation industry with a reliable source for their harnesses. In our history that spans over four decades.

## Defence Industry

When the best defence organisations in the world demand a quick solution, W.H.Kemp have been asked to provide rugged, dependable and rapid solutions by sub-contractor organisations. Whenever under pressure we are able to liaise, advise and deliver what our customers need.

## The Cable Harness

We use our extensive production techniques, knowledge and established buying power to build world class cable harnesses that are used in almost every industry. No matter how big or small we have the capacity to deal with your requirements.

## The sub-assembly

W.H.Kemp build sub-assemblies ranging from control panels to CPU's incorporating power supplies, PCB's and intrinsically safe components. We offer a full procurement service to our customers.

## Quality Assurance

Our quality controls include crimp force analysers, inline inspection, 100% electronic testing and full traceability of all parts. We are currently ISO9002 accredited and a UL approved manufacturer.

No: 951024

No: E101874

## 24 Hour delivery

We operate a 24-hour Kanban delivery service plus JIT and scheduled orders for our customers.

## Service

We pride ourselves by delivering the best possible service in an industry where good communication and technical foresight cannot be compromised in the final product.

## Project Management

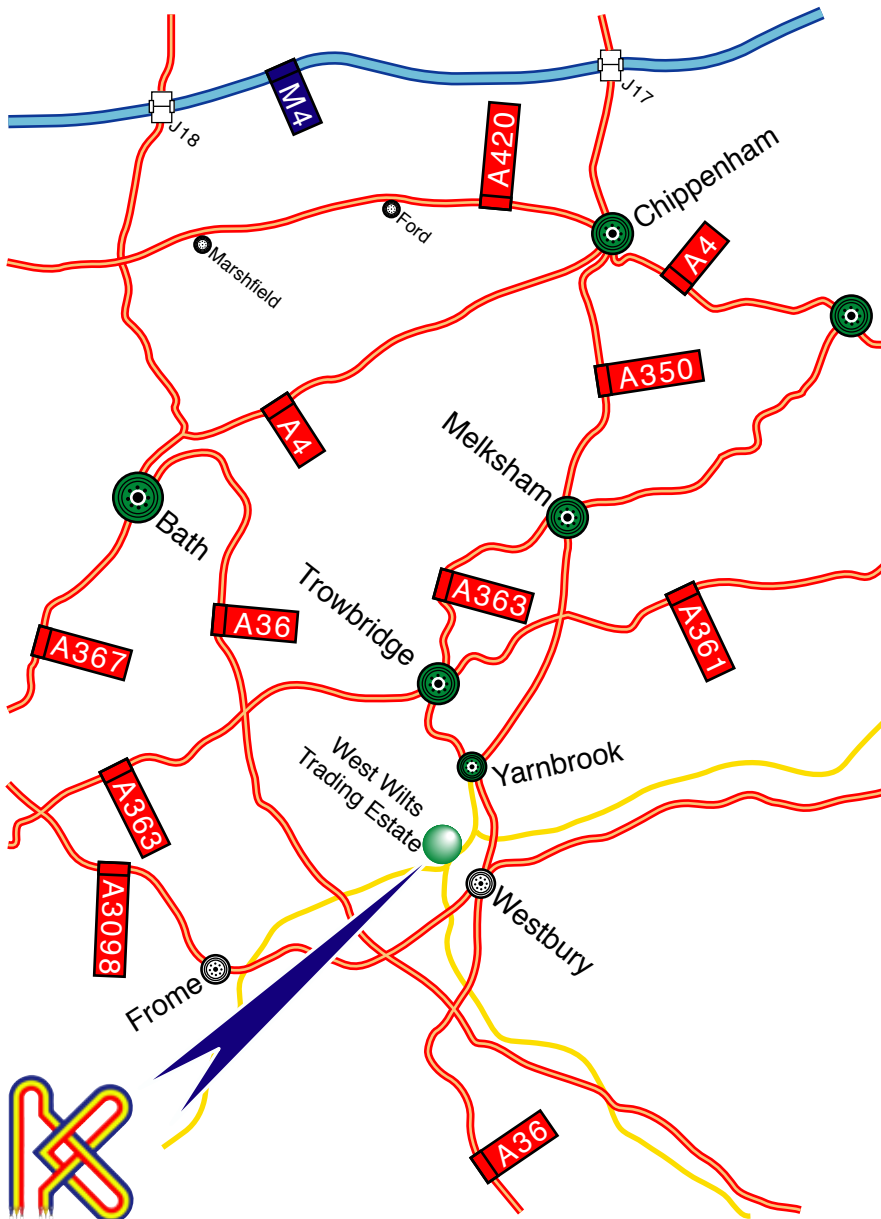

Our Project Management ability ensures the success of your project from the first phone call through to the delivery of your cable harnesses or sub-assemblies.

## Research and Development

Our skilled technicians can help you to develop your new harnesses and assemblies either at Westbury or on-site with our customers.

## Production

Our computer controlled, fully automated machines can cut, crimp, and terminate all cables to ensure that manufacturers exact specifications are met – the customer enjoys a quality product delivered on time from W.H.Kemp.

### From M4

- 1 Leave M4 at junction 17 and follow dual carriageway to Chippenham which is about 5 miles from M4.
- 2 Take the second exit off the roundabout at the end of the dual carriageway and follow signs for A350 Melksham which is 6 miles from Chippenham.
- 3 This will take you past Lacock and Melksham, once you get to Melksham continue on the A350 and follow signs for Semington, Trowbridge and Westbury.
- 4 Once you have passed through Semington you will come to another roundabout, follow signs for Westbury and take the second exit.
- 5 Follow this road to Yarnbrook which is about 5 miles, at the Yarnbrook roundabout take the second exit and continue straight on following the road under the railway line.
- 6 There is another roundabout almost immediately after the railway bridge, take the first exit.
- 7 Follow the road through one set of traffic lights and turn right into the West Wilts Trading Estate which is about a mile from railway bridge.
- 8 Continue along this road for a short distance and you will see the W.H.Kemp factory on the left.
